✉ zawminp2003@gmail.com 📞 +44 7788711505 📍 Oxford, England 🔗 [linkedin.com/in/zawminphyo/](https://www.linkedin.com/in/zawminphyo/) 🐙 github.com/zawphyo-Hub

PROFILE

Computing graduate with hands-on experience in developing full-stack web applications and implementing RESTful APIs using modern frontend and backend technologies. Skilled in database design, version control with Git and GitHub, and collaborative software development throughout the development lifecycle. Proficient in Java, React, Spring boot, JavaScript, PHP, Python, TypeScript, databases, and cloud services. Have strong problem-solving, analytical, and critical-thinking skills, able to learn new technologies quickly and contribute effectively in fast-paced, team-based environments.

EDUCATION

Oxford Brookes University

BSc (Hons) Computing

Grade: Upper Second-Class Honours (2:1) (3.6 GPA)

Student Story: <https://www.brookes.ac.uk/profiles/student/zaw-min-phyo>

Oxford, United Kingdom

September 2025 - June 2026

NCC Education

KMD Institute, Myanmar

- UK Level 4 Higher National Diploma in Computing (January 2023 - October 2023)
- UK Level 5 Higher National Diploma in Computing (January 2024 - December 2024)

PROJECT EXPERIENCE

Agenda - Event Registration & Digital Invitation Platform

Oxford Brookes University

React | Spring Boot | PostgreSQL | Google Map API | OAuth2

- Developed a full-stack event management platform enabling users to create events, send digital invitations, register attendees, and manage ticketing through a responsive web application.
- Designed and implemented **RESTful APIs** using **Spring Boot** to support authentication, event management, attendee registration, QR code verification, and email notifications.
- Implemented secure authentication using **Spring Security, JWT, OAuth2 Google Sign-In, multi-factor authentication (TOTP), and email verification.**
- Built a responsive **React** frontend featuring dynamic event creation, interactive dashboards, reusable UI components, and **Google Maps integration** for venue selection.
- Designed a **PostgreSQL relational database** to efficiently manage users, events, registrations, templates, and attendee data.
- Integrated **Cloudinary** for image storage and implemented email services for invitation delivery and attendee verification.

Github: <https://github.com/zawphyo-Hub/Online-Event-Registration-System>

United Students Union System

Oxford Brookes University

UML | System Design | Software Architecture | Team Project

- Collaborated in **a team of four to design a cloud-based student union management platform**, with each member responsible for developing the design of an individual subsystem.
- Produced software engineering artefacts including **UML use case, class, sequence, activity, and architectural diagrams**, along with detailed design specifications and technical documentation.
- Applied software engineering principles such as requirements analysis, object-oriented design, modular system architecture, and component interaction modelling.
- Developed comprehensive **test plans** and test cases to validate system requirements and support software quality throughout the design process.

Github: <https://github.com/zawphyo-Hub/Software-Engineering-Project>

Connect 4 Game

Oxford Brookes University

Java | Java swing | JUnit

- Developed a multiplayer Connect 4 game in **Java**, providing both **graphical (GUI) and command-line (CLI) interfaces** following the **Model-View-Controller (MVC) architecture.**
- Designed reusable object-oriented components to separate business logic, user interface, and game state management.

- Implemented comprehensive **JUnit unit tests** to validate core game logic, including win detection, board validation, and player turn management.
- Applied **Git and GitHub** for source control, maintaining regular commits throughout the development lifecycle.

Olympic Performance and GDP Data Analysis & Visualization

Oxford Brookes University

R | Data Analytics | Exploratory Data Analysis (EDA) | Data Visualization

- Conducted an end-to-end data analytics project using **R language** to investigate the **relationship between Olympic medal performance and national GDP**.
- Gathered, cleaned, and merged **Olympic Games and GDP datasets** by standardising country names and filtering relevant records for Summer Olympic Games.
- Performed **Exploratory Data Analysis (EDA)** using descriptive statistics, scatter plots, histograms, and bar charts to identify trends, distributions, and correlations between GDP and medal counts.
- Designed and developed **interactive data visualizations** to compare Olympic performance trends and GDP growth for selected countries between 2012 and 2022.

WORK EXPERIENCE

J & L Catering Front of house	April 2026 - Present Oxford, England
• Delivered excellent customer service in a fast-paced hospitality environment. • Managed customer orders accurately while maintaining efficiency during busy periods. • Worked collaboratively with team members to ensure smooth daily operations.	
Welcome Break Crew Member - Taco bell	Sep 2025 - April 2026 Oxford, England
• Provided friendly and efficient customer service in a high-volume environment. • Prepared food and processed orders while maintaining quality and accuracy. • Collaborated with colleagues to meet operational targets and deliver excellent service.	

VOLUNTEER EXPERIENCE

Digital Helper Volunteer Oxford Brookes University Volunteer Centre	June 2026 Oxford, England
• Assisted older adults and digitally excluded individuals with using computers, smartphones, email, and online services. • Provided one-to-one support to troubleshoot basic technical issues and improve users' confidence with digital technology.	

HIGHLIGHTED PROFICIENCIES

• Programming Language:	Java, JavaScript, PHP, Typescript, SQL, Python, R
• Framework:	React, Spring Boot, Bootstrap, Node.js
• Databases:	MySQL, PostgreSQL
• Development Tools:	Git, GitHub, Docker, Postman, PhpMyAdmin, Word, Excel
• Cloud:	AWS, Google Cloud
• Soft skills:	Problem Solving, Analytical Thinking, Teamwork & Collaboration, Good Communication, Fast Learner, Attention to Detail
